

KEPLERA SECURES €770K TO REVOLUTIONIZE LEGAL DOCUMENT MANAGEMENT WITH AI

Palermo, April 14, 2025 – **Keplera**, the legal tech startup streamlining the creation and management of legal documents, has closed a **€770,000 funding round**. The investment was led by **accelerator Magic Mind**, backed by **Zest** and **Fondazione Compagnia di San Paolo**, with participation from **OpenT**, the 50/50 joint venture between Tinexta and Zest, and **Frontech**, **CDP Venture Capital's national accelerator for frontier technologies**.

Keplera is the creator of **LexHero**, an all-in-one platform designed to manage legal documents more efficiently and securely. Powered by artificial intelligence, LexHero features a smart editor that simplifies legal documents' drafting, storage, sharing, and signing.

The platform ensures secure document handling through end-to-end encryption—crucial for companies managing sensitive data. It also integrates a dynamic password or SPID-enabled digital signature tool, making it an effective solution for businesses of all sizes and industries. 2025 is proving to be a pivotal year for Keplera, marked by solid revenue growth and key partnerships with major players including InfoCert, OpenDotCom, and ENEA. The company is also gaining traction in the corporate sector, working with organizations such as Edison, Banca Popolare dell'Emilia-Romagna, and the Intesa Sanpaolo Group.

With a mission to innovate legal services, Keplera is operating in a booming global legal tech market, which reached a value of \$26.7 billion in 2023 and is projected to hit \$55 billion by 2029, growing at a CAGR of 12.8% between 2024 and 2029.

"We're incredibly proud of the innovation we're bringing to the legal space. This round will allow us to fuel healthy yet rapid growth, continuing to invest in our technology and expand both domestically and internationally. Collaborating with top-tier partners also allows us to keep pushing our boundaries and unlock new market opportunities. Lastly, we're thrilled to be creating real impact in Sicily - our home base - by generating value and opportunities through strong connections with both Italian and international ecosystems", said **Manfredi Domina, CEO of Keplera**.

"Artificial intelligence is redefining the future of the legal industry, transforming the way law firms and advisory businesses operate. Keplera perfectly embodies our vision of AI as a strategic partner—streamlining document workflows, accelerating processes, and empowering professionals. It's all about building an ecosystem where efficiency and innovation go hand in hand", said **Gabriele Ronchini, CEO of Zest Investments and Vice Chairman of OpenT's Investment Committee**.

"Keplera's recent funding round highlights the strategic importance of AI in the legal sector. Through OpenT, the Tinexta Group is committed to backing forward-thinking solutions that enhance efficiency and elevate professional services. Keplera is a clear example of how AI can revolutionize both document management and legal consultancy—aligning perfectly with our vision of a digitally advanced future", said **Valerio Zappalà, Group Chief M&A and Integration at Tinexta and Managing Director at OpenT**.

"We're especially proud to back Keplera. We strongly believe in this team's mission to transform the complex legal sector—traditionally slow to adopt innovation—using artificial intelligence. This is exactly the kind of entrepreneurial initiative we're looking to support through Frontech. We're confident that AI and deep tech can be applied across all industries, and that Keplera's innovations will significantly improve the work of thousands of professionals", commented **Stefano Molino, Head of the Accelerators Fund at CDP Venture Capital**.

About Kepler

Kepler is the legal tech startup behind **LexHero**, an AI-powered all-in-one platform designed to make legal document management simple and secure. LexHero leverages artificial intelligence to deliver advanced features like a smart editor that streamlines drafting, storing, sharing, and signing documents.
